COLLINS OTIENO

Nairobi, Kenya 88778 | 📞 +254743686810 | locozoombady@gmail.com

Objective

To leverage my creative problem-solving abilities, data driven mindset and technical expertise to develop and execute innovative strategies that drive measurable growth and impact.

I aim to contribute to a dynamic and ambitious team, fostering collaboration and continuous learning to achieve transformative results in a fast-paced, evolving environment

Experience

Blockchain Engineer   **08/2023 to 03/2024**

Dfinity   **Remotely**

- **Smart contract development:** Built, tested and deployed smart contract using Motoko language.
- **Collaboration and innovation:** worked closely with cross functional teams including cryptographers and innovation: worked software engineers to push the boundaries of blockchain technology.

ICP ambassador   **02/2023 to 05/2024**

ICP hubs Kenya   **Nairobi, Kenya**

- **Community growth and Engagement:** Spearheaded developer and community outreach programs, including:
    - **Organizing events for community meetup:** I organized local blockchain and web 3 meetups to bring together enthusiast and professional to spread the word about the alien tech (ICP) and network.
    - **Online forums**: actively participated in WhatsApp communities and telegram groups helping newbies with troubleshoot coding issues.
    - **Brought on board at least 1000 committed new members to the community**
    - **workshops**: conducted several educational workshops and hackathons both on blockchain development and Dapp for students and professionals

front-end Developer Intern

- Collaborated with cross-functional teams to develop and implement high quality web applications**.**
- Built and optimized responsive websites using front end frameworks and libraries
